MANAGEMENT DISCUSSION AND ANALYSIS REPORT

The world economy continues to face challenges on the road to sustained recovery, including the recent developments in the Middle East. In the context of the slow recovery in the developed markets, the focus of the world is on the developing and emerging economies, including India. According to the Economic Survey of the Government of India (2010-11), the Indian economy has recovered considerably and rapidly from the slowdown caused by the Global Financial Crisis in 2007-09. India was not as affected as some of the matured economies, owing to a robust regulatory system and a domestic demand driven economy. After a dip in 2008-09 with a lower GDP growth rate of 6.7%, the economy registered a V-shaped recovery, witnessing 8% growth (Quick Estimates) in 2009-10 and then 8.6% growth (Advanced Estimates) in 2010-11. The economy experienced a more balanced and positive growth in 2010-11, aided by a solid recovery in agriculture and continued good performance of industry and services. There has, however, been a deceleration in industrial growth in the second half of the year and a further deceleration in the last quarter of 2010-11.

INDUSTRY STRUCTURE, DEVELOPMENTS, OPPORTUNITIES & THREATS

Indian economy continues to be one of the fastest growing economies in the world. The economic recovery witnessed after the global meltdown last year has been sharper than what was anticipated. This has enhanced confidence about the sound fundamentals of Indian Economy and it is expected to have GDP growth of more than 8% in the current financial year and more than 10% in the next couple of years.

India's domestic trading market is growing at compounded annual growth rate of 13.6% in past 5 years and it has grown to achieve more than 5.9 billion units. India plays a major role in global trading markets due to availability of abundant man power, raw material and infrastructural developments. Indian exports in trading sector grew by 11.7% per year in the past 4 years, comprising export of cotton, man-made fibre, silk, wool, jute and other tradable materials.

OPPORTUNITIES

The overall assessment of demand and market potential, projected on the basis of past trends and industry expectations, is expected to grow by more than 10%. Domestic consumption of tradable products is increasing due to growing corporate salaries, earning capacity of individuals. India is home to 17% of world population. It is also one of the youngest countries in the world, with over 65% population below the age of 35 years. In India, there are more than 30 crore middle class people with higher disposable income. The number is expected to be doubled in next 2 years, which will bring increasing demand for various consumer products by this segment of population.

THREATS

Due to global meltdown, the consumers in the west have reduced their consumption of tradable materials. The growing awareness about ecological factors has impacted exports from developing countries due to use of polluting dyes and environment damaging manufacturing practices. The availability of cheap labor in China, Bangladesh and Vietnam is also contributing to decline in exports of tradable goods from India.

The post 2005 trade regime under World Trade Organization has resulted into the enhanced competition across the globe.

SEGMENTWISE or PRODUCT-WISE PERFORMANCE

Your company mainly operates in single product segment, within domestic market only. After years of closure of business, the management of your company have started trading activity in domestic market. The business is expected to grow in the coming years.

FUTURE OUTLOOK

Tremendous boom in retailing industry is basically due to increase of consumption of household products. Due to significant increase in income levels, the consumption pattern has also changed. The life style of individuals is changing and they are preferring products under premium segment. Despite temporary setback for few months due to global meltdown, Indian economy had recovered faster than expected. The adverse impact of western financial meltdown is not acutely felt due to domestic industry and consumption.

Your company has taken various initiatives for increase of business, product portfolio. Presently, we are doing business in domestic market but we are exploring possibilities of export of our products to the western countries, where we had been doing business about a decade ago. We are also exploring the possibilities of leasing out an industrial unit on enhance our productivity and launching of quality products in the market.

STRENGTHS

Your company had a long reputation in trading segment. In the coming years, we may plan to diversify by including the range of products as per the demand of the market. Due to growing multi brand outlets, we do not foresee any difficulty in pushing the brand in the domestic market. We had a customer base in western markets for our products. We can leverage our capacities to procure products for export markets also.

RISK AND CONCERNS

Business is exposed to external and internal risks. Some risks can be predicted and minimized with careful planning and implementing the measures to mitigate them, while some risks cannot be insured against. Your company has been facing many risks including

risk to run business due to shortage of working capital. The tight fund situation may affect company's plans to enlarge its business activities. Due to tight liquidity position, we are not able to lay hands on talented people in the industry. The management of your company is planning to leverage their personal assets to raise funds for the company, to overcome this risk.

The domestic market is showing inflationary tendencies. To curb inflation, the Reserve Bank of India can tighten its monetary policy, which can affect company financial expenses. Fluctuation in value of foreign currencies can also affect export plans of the company.

HUMAN RESOURCES

The company is taking various initiatives to increase human resources for better productivity. To save on costs, the company is appointing non-experienced staff and taking initiatives for internal training and development of skills. This will help in enhancing their emotional and intellectual engagement with the company.

INTERNAL CONTROL SYSTEM AND ADEQUACIES

Your company had started its business from scratch. To grow it faster, the integrity and ethical behavior of management and employees at all levels and compliance of the laws and regulations is very essential. The systems are being put in place to ensure adequate internal controls in operations of the company. Apart from statutory audit, your company has adequate in-house internal audit practices.

FORWARD LOOKING STATEMENT

Statements in this report on Management Discussion and Analysis, describing the company's objectives, projections, expectations or predictions may be forward looking, considering the applicable laws and regulations. These statements are based on certain assumptions and expectation of future events. Actual results could, however, differ materially from those expressed or implied. Domestic consumption, price trends, change in government regulations and tax structure can make a difference in company's performance in future.

The company assumes no responsibility in respect of the forward looking statements herein, which may undergo changes in future on the basis of subsequent developments, information or events.
